

New modular external IO-module

CANopen®

PROFI®
BUS

Modbus

The flexible and scalable high-performance system is optimized for textile finishing machines automation. It can be equipped with CANopen®, Profibus DP® and Modbus RTU gateways:

- Modular IO-unit: Up to 6 IO-boards per gateway, in an aluminum rail housing.
- Highly flexible modules:
 - Switchable digital 16-IO – 24V/GND
 - Switchable analogue 4-IO – 0-20mA / 0-10 V / PT100
 - Digital 8-IO (relay output)
- Simple address selection via rotary switch
- Compatibility with Profi16/32
- 2 Fast counters (10Khz)

Flexible, compact and economical

Concept:

- All inputs are equipped with green, all outputs with red LED's.
- All inputs and outputs are optical isolated.
- Status-LED's showing the actual status.
- All connections equipped with plug-in terminals.
- Ready to use bus cables in desired length on request.
- Simple and fast assembly.

Modular-IO configuration:

Scalable solution: With the bus coupler gateways for CANopen®, Profibus DP®, Modbus RTU, different configurations are possible. Each board has a length of 80mm. From one up to six different IO-boards supported. The rail mounted housing can be delivered in length of 160 up to 560mm.
